

A large, woven burlap sack is filled with a variety of poultry feed. The feed includes a mix of grains like oats and corn, along with smaller seeds and dark, round pellets. A silver metal scoop is partially submerged in the feed, with its handle extending upwards. Some feed has spilled out of the sack onto the light-colored surface it's resting on.

**POULTRY FEED**

# Poultry Feed

## Broiler Starter Feed

High-protein feed designed for chicks in the first few weeks to support rapid growth and development.

## Broiler Grower Feed

A balanced feed for broilers in their growth phase, promoting weight gain and muscle development.

## Broiler Finisher Feed

Formulated to maximize weight and body fat accumulation in broilers just before slaughter.

## Layer Starter Feed

Nutrient-rich feed for young laying hens (pullets) to prepare them for egg production.

# Poultry Feed

## Layer Grower Feed

Feed designed for pullets from 8 to 16 weeks to maintain healthy growth and development before laying.

## Layer Finisher Feed

Formulated for hens after 16 weeks to optimize egg production, ensuring quality and quantity.

## Pre-Starter Feed

Specially designed for chicks aged 1-7 days, providing essential nutrients for healthy development.

## Breeder Feed

A nutrient-dense feed for poultry used for breeding, promoting egg production and reproductive health.

# Poultry Feed

## Concentrate Feed

A high-density protein feed that is often mixed with grains to provide a complete nutritional solution.

## Organic Poultry Feed

Made from organic ingredients, this feed is GMO-free and contains no synthetic additives, catering to the growing organic market.

## Corn-Based Poultry Feed

A primary energy source for poultry, this feed is rich in carbohydrates and helps promote growth and vitality.

## Soybean Meal Poultry Feed

Indian sapotas are highly sweet, aromatic, and have a smooth texture, making them popular in global markets.

# Poultry Feed

## Sunflower Meal Feed

A cost-effective, plant-based protein source, sunflower meal provides essential nutrients and supports digestion.

## DDGS (Distillers Dried Grains with Solubles) Feed

A by-product of ethanol production, DDGS is a protein and fiber-rich feed that supports poultry health.

## Fish Meal Feed

A high-protein supplement made from fish processing, offering essential omega-3 fatty acids for poultry.

## Rice Bran Poultry Feed

A fiber-rich feed made from rice milling, promoting digestive health and balanced nutrition for poultry.

# Poultry Feed

## Wheat Bran Poultry Feed

A fiber and mineral-rich feed for poultry, enhancing digestion and providing necessary energy.

## Herbal Poultry Feed

Blended with natural herbs to boost immunity, digestion, and overall poultry health, providing a more holistic feeding option.

## Pelletized Poultry Feed

Compressed feed in pellet form, which helps reduce waste, enhances digestibility, and provides a uniform nutrient supply.

## Mash Poultry Feed

A finely ground feed for poultry, ideal for chicks and older birds, offering easy consumption and digestion.

# Poultry Feed

## Maize Gluten Meal Feed

A protein-rich by-product of corn processing, used as an energy source for poultry growth.

## Grit and Calcium Feed

Crushed limestone or oyster shell-based feed that strengthens eggshells and supports bone health in layers.

## Probiotic Poultry Feed

Enriched with beneficial bacteria and enzymes to improve digestion, gut health, and immunity in poultry.

## Meat and Bone Meal Feed

A high-protein supplement derived from processed animal bones and meat, enhancing poultry nutrition.
